" THE GOOD AND THE BAD . "

No serious student of the Flying Saucer subject who accepts the belief in their being manned extraterrestrial vehicles, is not long in his course before he is confronted with the apparent contradictory behaviour of them in their demonstration , both to individuals as well as to other material things. such as planes cars. etc. for whilst it has to be admitted that in general this behaviour of the people and their crafts seem to strongly indicate , as most believe, a benevolent attitude and character, yet there has been the numerous cases in which forms of hostility have been shown , or the student himself finds himself involved in strange or weird " happenings" which cannot be explained as normal, all of which events seem to have some strange connection with his study of " Flying Saucers ".

These and other circumstances have led quite a few to declaim all the Saucers as evil , especially is this so in the religious world. whilst others more open minded have gone into the facts and felt that it indicated that there could be two forces at work . yet this led to the query as to whether they were identical or two forces of themselves opposed to each other .

Strangely enough the man who has had the greatest impact on the world in the introduction of the subject , George Adamski, has himself of late come to lay much more emphasis on the possibility of some of the " visitors " being hostile and even suggests a defence against such , using the human agency of a world space programme , as a means of combating such, to the Editor however this displays a weakness in admission, in that if these bods of evil intent, are superior to us so much scientifically , then one needs more than a physical scientific knowledge to overcome them . for even if we were to acquire the knowledge to conquer space, on equal grounds, we still would have to meet them on moral and ethical grounds in a way superior to them . This whole thing suggests a " war in space " on both these grounds. Surely G.A. does not suggest we carry our already overburdened war mongering into space, for that

PAGE TWO.

is just what it would mean . and we strongly feel that until mankind has " made himself WORTHY to go into Space " it is wiser he keep to this terra firma. for he may find that he will not be ALLOWED into those regions to carry his unworthiness and spread his contagion of warmongering so far . First become WORTHY of task of Conquest.

Hear what G.A. has to say vide his letter of Oct. 1960 entitled Highway to the Stars. " Still who is to say that defence will not be needed ? ---- Beyond our system are whole systems whose peoples have not progressed socially as far as we on Earth , yet some of these people have advanced beyond us scientifically and do have space ships and later he says. At the same time , having a knowledge of self protection does not mean that our own space travellers and ships would have to go out beligerently to start war against anyone . The main purpose for men. ships and equipment would of course be primarily for research . study and exploration. "

Seems to me I've heard that all before until some trigger happy guy started something with the " protective" equipment. and rival jealousies fanned forces one against the other . No George. fit man with all the scientific forces possible for space and it would not be long before He himself would be following the same old pattern . of hate enmity jealousy etc.

However G.A. is not the only notable person who has suggested the possibility of hostile invasion . Gen Mac Arthur did this quite a few years back and suggested that we may have to meet such an opposing force. in the next war. Note WAR .

In an interview with a high security officer some time ago , your Editor discussed this very subject of hostility etc. and said he felt that the visitors were in the main of peaceful intent . the reply from the official was that " we had to prove that" the inference being that officially he did not think so .

It therefor appears from our observance in research and the attitude of those who are supposed to know about them . that there are definitely at least an acceptance of a hostile force or forces in regard to the UFO. and having reached the stage where we accept this possibility we find ourselves faced with the further problem of discovering the origin of the hostility and the force behind it .

When one begins to delve into this side of the case we find that not all the unexplainable incidents are directly connected with the vehicles from space. in fact there seem to be different kind of forces at work , yet somehow intangibly tied up with the investigation of the UFO. Some seem to come from some source much nearer home .

One cannot delve into cases like Bender, Jarrold, Stuart and the many other confidential cases which reach the serious student and many others yet not revealed., all of which have involved

leaders of the movement. ie heads of groups or societies, an investigation into which reveals some strange re-occurring pattern common to each. yet with so little evidence from them that one cannot pin it down to what the force was at work . yet undeniably was the fact that some power was "having a go at them". and that not in a pleasant way . the strange suddenness of the attacks. the threatening of their lives and their loved ones. and all this when they became more than interested in a certain very cold place which is held into more closer security wraps than and Atomic base.

From these and the " air incidents", " missing people " Strange ship incidents , the pattern emerging seems to resolve itself into at least three categories or possibly four. all of which have been put forward before by those endeavouring to solve the problem . some claiming that only one of them is the answer , others the possibility of two or more.

1. The fact suggested by G.A. that they come from space and that they are not all friendly and benevolent .
2. The possibility of some subterranean races of earth . which have certain places where they come and go. and who use some known science to create UFO. similar to those from space.
3. The fact of a terrific combination , not necessarily large compared to human figures, who control governments . powers, and the world behind the scenes, and who are inspired and dedicated to world dominion by evil forces and powers similar to black magic using powerful metaphysical as well as physical means to attain this goal , subtly enforcing their will upon mankind using all forms of control. to accomplish their task .
4. The possibility of all the above three being closely related either consciously or subconsciously , working with each other toward one goal, or that they are aware of each other and using such forces at their hand and Governments and peoples as pawns in their struggle against each other.
5. A very apparent intensified program of good versus evil in the last 20 years or more. Whatever our opinion or or views of the above, we cannot deny that this phase of saucer study certainly requires our attention, for we need not be greatly concerned with space men who desire to help us rather fear and concern is the opposite they desire us to have concerning them, for it is with active cooperation that two friendly parties achieve something.

PAGE FOUR.

But neither must we fear these opposing negative forces. for fear itself will weaken our efforts to overcome, rather we must fit ourselves with KNOWLEDGE of our opponents. for once we KNOW who and what these forces are half the battle is won , it is the FEAR of the unknown , the intangible force you can't get at that makes the task so difficult, and it is here that that many fail and turn back , because having started in a course of investigation , they suddenly realise that they are up against forces which are dynamically and diametrically opposed to the usual course of things. and the natural reaction of fear of the unknown overwhelms the seeker and he succumbs to his fear and violently opposes all such study and labels it as dangerous. which actually it is, ie if you are filled with fear of it, and not some greater force such as FAITH or a greater power than the opposing force.

But the wise student arms himself with the necessary powers which enables him to courageously step forward into the arena. for with Knowledge of his enemies and the Wisdom how to overcome him or disarm him. plus the Power to put that Knowledge and Wisdom into action . makes him a Victor. for they rarely continue their efforts when they see the student so equipped.

Are there Bad forces at work ? I would say YES.
Are they Active?. Very Much So.

It is for the serious student to decide which category they fit into, and equip himself to meet them as they come. remembering that the Good forces are more than on your side. and will assist in every way possible to aid you,

Do not be cajoled into believing that any man made programme will be able to defeat them . ie. while man remains in his present undeveloped spiritual state. BEWARE of him who would lead you to tie yourself with him to any set of powers who claim to be able to conquer space. while man is still in his unchanged attitude mentally to warfare, for I repeat that until man has proved himself WORTHY of Space. He will never be allowed to get very far into despite all urging of boosting programmes economic or otherwise to conquer it. The vital issue is to make ourselves worthy to conquer Space , by first putting ourselves right and then with our fellow man.

No matter how glowing a picture one presents or how great the man. unless he places those qualifications first, before any programme of Space economic salvation . BEWARE of him for his building is set on false issues and certainly will not stand the test of the Great Master Architect and Builder . Watch and carefully weigh the company such a man keeps. if he moves in the circle of those who have in the past used all the forces of mankind to bondage economically and finally to warfare. you can hardly expect that the fruit he will bear will be any different from that produced before. By their fruits ye shall know them .

Ally yourself to all the forces of Good whose basic quality is founded in spiritual not material foundations, and you need not Fear the Bad Forces Rather you will conquer them by your superiority, in Faith , Knowledge, Wisdom and Power.

PAGE FIVE.

THE SOLAR ORBIT SPUTNIK.

(From Search Magazine U.S.A.)

It is significant that the Russian solar-orbit rocket was lost from all detection, including visual, as well as radar and radio at a relatively short distance beyond the moon. Although the giant rocket contained batteries sufficient to last for months of signalling, here we have the radio going dead in a few days' time and all contact lost .

Its " orbit " is one we are asked to accept on the basis of " mathematical calculations " alone , and not on actual evidence . The truth of the matter is that the Russian solar -orbit rocket was lost from all ken of man just beyond the Moon.. This , in spite of the statement by our own scientists that modern radar techniques can detect a body as large as a "spaceship" billions and billions of miles out into space. We have "bounced" radar signals off the sun. Yet, we cannot detect Russia's solar-orbit rocket a mere million miles away! Why, Because it isn't there to detect anymore ?.

SUDAN VILLAGERS SEE FLYING CITY .
Courtesy James D Wardle.

Deseret News and Telegram 2/1/61
(Salt Lake City)

KHARTOUM SUDAN . (UPI)

Maybe it was just a mirage but four villages in western Sudan think they saw a city flying through the air the other day .

Khartoum newspapers printed reports from Abuzabad that the villagers saw the city " Complete with high buildings and trees " sailing slowly through the air last week .

Authorities here say they were investigating .

.....

We cannot comment on such meagre evidence . except to say that if not a mirage it was certainly an unusual type of U.F.O. Somewhere in Saucer literature we have heard of such cities from afar, and such a one is described in the Bible as " coming down out of heaven ". Maybe this could be a new phase We would like to have further information on this strange mirage.

.....

AN AMAZING STORY SEE PAGES 15 to 20.

In connection with the above, we hope to print in our next edition an analysis of this remarkable story . and its claims. this will be handled by our Vice President . Mr Alex Millikan who has made some research into the statements and claims of the writer , and will endeavour to give a fair and yet critical review of the same .

By Marcus. E. Dodd .

By a not very difficult process of thinking it is possible to convince oneself that if you did not exist in some spot of the Universe , then neither would the Universe exist . You could even say the Universe exists because you are in it.

The stars in the night sky are there because you see them, though actually their light which focusses on your retina may be thousands of years old .

The place of Man in the Universe is obviously purely relative. Recognition of that fact prompted a prophet of old to call to an unseen Creator of whom the starry firmament was clear evidence of His mighty handiwork, asking, " What is man , that Thou art mindful of him ? "

We live on earth to answer that vital question .

Man is one with all earthly creatures. His beginning is fishlike, in its watery darkness, the light of day finds him helpless and later crawling like the animals. Only when he walks erect and raises his eyes to the heavens does he rise above the other creations of this world. Descending we meet in the material dross, but ascending we seem to go alone into the great unknown . Yes, man has an earthly body to work his will upon material things. Yet, as the struggle eases and there is time and energy to spare after his physical needs are met, it is then that his mind ponders things no animal brain can contemplate.

Things beyond the emotions , for animals experience them ; deep disconsolate sorrow, hunger and the joy of eating, affection and hate.

Beyond all these things the mind of Man looks out on the Universe and asks, " Why am I here ? . " " What is the reason for it all ? .

To the materialists the answer comes readily enough , depending on the type , one says , " To enjoy myself ", and the rarer altruist avers his purpose is to make this world a better place to live in , for those who follow him .

And so they meet the material world on its own level of motion and energy. Motion is everywhere apparent . Things drop, the earth turns it revolves around its sun , the sun whirls in our local galaxy and our galaxy moves with seventeen other stars cities in a certain motion pattern . Now the Phenomenon of motion turns out to be a problem as difficult and great as that of matter itself . Relativity states that matter itself is nothing but motion . Instead of saying matter has energy, Relativity states that matter IS energy .

But can the materialist tell us what energy is?. Oh yes, we know what it can do: We have seen its effects everywhere, and we know how it links at the end of the electric wires to hurt us if we are unwary. But what is electricity, what is gravity, what is magnetism ?. They are all more than simply attraction and repulsion .

The difficulty in all such questions is trying to establish an understandable relationship between matter, which used to be regarded as a tangible entity, and force which is spoken of as intangible .

Of course to make force a property of matter was only to beg the question that explained nothing . It is more illuminating to accept the suggestion that matter and energy are two different aspects of the same thing. In this way we conceive matter as once being intangible energy or force, and so matter takes on a non-materialistic value.

The new cosmology exponent , Fred Hoyle , has even written that various atoms composing material , do not exist and then later they do, he says " the created matter does not come from anywhere".

And so this earth upon which we crawl and strut for a little season is a concentration of energy into matter. We have to decide whether it was fortuitous or for a purpose and consider it inanity to regard the amazing creation of this earth as fortuitous . Behind it all there surely must be a guiding hand, a Mind that has a purpose, - a purpose which gives Man a place in the Universe.

In his book " Reach for the Mind " J.B. Rhine has shown that man can generate and direct energy from his mind which will affect physical . material things. Science through the intensity of its research, has finally shown us the futility of material explanations and brought us to the point where physical perceptive machinery is almost useless. It cannot help us in the unfathomed realms now confronting us.

The atom , once thought to be the solid building block of the Universe now is known as a centre of protons with circling electrons moving in space relatively as vast as our sun with its accompanying planets. Materialism turns out to be unsubstantial ; it loses its solidity in space. To understand this problem which challenges Man again after his wayward journeying into scientific materialism. we must explore the Mind of Man and his spiritual needs.

This earth then appears as a testing ground, a place where man learns and obtains experience . A previous existence of Mind must be presumed , and a future existence in some bodily form becomes a reasonable corollary if certain conditions are met . What these conditions may be is the basis of many religions- but outside the ambit of this discussion . Each person chooses a religion that suits him and thereby shows a significant difference from other creatures. However , his mind chooses nothing higher or more exacting than his material body can accept. So curiously enough Man's body is the anchor which holds him down to solid earth and its materialism. But his mind needs a Saviour, - someone who can lift him above and out of his dreary self. He makes puny efforts to travel into space. yet finds no spiritual comfort there.

However, space is not empty , it abounds with intelligent beings of astral , etheric, and ,aterial substance . Of this there is ample evidence which , as yet ,is not acceptable to the materialistic mind. But however reluctant he may be he will be forced to the conclusion that modern physicists are accepting,- matter is illusory, mind is real .

Man can grow into the Universe only as his mind grows in knowledge ,in Wisdom and understanding. The glory of our Creator lies not in the mightiness of mere mass, but rather in the intelligence of the mind in thinking, reasoning, feeling, expressing and deciding , is the purpose of this earthly existence . When you accept that purpose , you honor the individuality of Man . No longer is he a mere cog in a wheel of some great totalitarian machine. Instead of being an insignificant blob of matter , he becomes a vital , individualistic purpose of Creation , Offspring of God, the Supreme intelligence, his mind spans the Universe which can be his home.

PAGE EIGHT.

" WHAT IS HAPPENING IN THE SKIES ? . "

BY

REV. R.A. NELSON. COLOMBO CEYLON

One day ten years ago I walked into a book Exhibition held here in Colombo. There was no other thought in my mind than my usual interest in books, and my pleasure in examining some new ones. In the course of that casual half hour, I glanced through a well-known British magazine and read something which opened a new world to me. It was a brief account by a reputable English journalist of several of the early sightings of the strange new objects in the sky, which we now know as flying saucers.

Up to that time I had never heard of the things or in my wildest dreams conceived of such a possibility. This brief account picked up by chance came with a shock of a new discovery. Today I possess a small library dealing with this particular phenomenon and on my desk rests a striking picture of a ' saucer' over a fjord in Norway, one out of many thousands of pictures that have been taken in all parts of the world.

If you are one of those who believes that these so called sightings are simply hallucinations then my talk will seem to you rather unnecessary, I am not concerned to persuade you one way or the other but simply to unfold what I believe to be an aspect of reality and to inquire how we may begin to fit in this new strange segment of reality into our total view of the universe..

THE BASIC QUESTIONS ARE : What are these objects seen in our skies?
Why are they appearing at this time ? Are the space beings that supposedly
ride in them , good or evil.?

There is one peculiar factor in relation to this whole inquiry. that is the fact that we have no clear information from the official sources. Governments in the main have kept silent on the subject . Some have obviously discouraged any undue interest in the subject , and persons in the employ of these Governments have been under pressure not to divulge what they have seen . the Royal Air Force in Britain are said to have compiled a full report on the 'saucers' and to have announced that this will not be released to the public either now or in the likely future. I believe the Brazilian Government is the only government that has officially admitted the reality of these objects. Reading between the lines it seems clear that Governments are in the possession of information which they are not prepared to disclose to the general public. We have yet no clear answer as to the reason for this Governmental silence: we have to guess the answer.

Our information then about the 'saucers' comes in the main from the many thousands of individuals who have sighted them in all parts of the world. ordinary people like you and me, specialists like astronomers and technical experts . military and civil air line pilots and the thousands of sightings by radar. Hundreds of saucer groups have carried on an active investigation of sighting reports, many of these of high scientific competence . Radar sightings have been made from the ground and from the air at exactly the same time the ground observer checking with the radar crew

of a plane in flight . Sightings both by radar and the naked eye have taken place at one and the same time . For many of those who witnessed them these sightings were totally unexpected. Some had never heard of ' saucers ' , others were completely sceptical . They have been reported from all parts of the world. An early famous sighting came from Conistan in the Lake District of England by a schoolboy, Stephen Darbyshire who got a picture as well. On March 24th 1955 an 'object' streaked across England. One of those who saw it was friend of mine the Rev. A Stanley Beaty. In one of the most interesting of the saucer books entitled " The Unexplained sky " by Arthur Constance you will find two letters to the author from Mr Beaty describing the 'thing ' he saw in the sky on the evening of that day .

These space craft seem to fall into two main types. the circular object shaped like a saucer, hence the name , and the cigar shaped or rocket type such as Mr Beaty saw. The saucer is thought to be a scout ship and the rocket type a mother ship . Some of the mother ships are said to be of vast size . several thousands of feet in length and in some cases perhaps several miles in length . The speed and manoeuvrability of these craft can scarcely be believed. They have been tracked on radar at speeds of 20,000 miles an hour in our atmosphere. They are able to make sudden stops and complete turns which no earth-made machine would be remotely capable of doing. They seem to be surrounded by a magnetic field. All these indicate their non- terrestrial origin. One theory which has gained wide acceptance in recent years is that they are four dimensional, that they 'emerge' from a dimension of matter different from ours, are able to enter our octave of matter and withdraw from it again . There is much evidence to support this. What seems to be conclusive is that these objects are real; they have a non-terrestrial origin. That conclusion we can arrive at even apart from any contact with the space beings concerned.

THE BURNING QUESTION IS ? WHY ARE THEY HERE ?. Before we attempt to guess at any answer perhaps it would be wise to examine our third question . ARE THE SPACE PEOPLE FRIENDS OR ENEMIES ? . Do they come with good purpose or evil intent . ?

Even to this question we cannot give a complete answer. We can however say that in the main our space visitors are here to help us and that they come as brothers and friends. There is some evidence to indicate that evil forces have been operating in the skies, and we do not know whether these come from outer space or whether as seems more likely , they are in some way connected with this planet earth and are restricted to the earth-moon area of space. There is a good deal of mystery here towards which we have to preserve a vigilant and open mind. But if, as all the indications point to, our earth is surrounded by countless numbers of space beings and space craft, it is only reasonable to conclude that they are here on a mission of mercy and help , for if they were hostile and come as invaders, there can be no doubt that long before now we could have been wiped out. Before their immense superiority of knowledge and power we would be helpless as an unknown savage tribe today would be before a modern army armed with atomic weapons.

Another fact in support of this is the realisation. that space visitors have been coming to earth for thousands of years.

In the last twelve years an immense amount of investigation into old records has been done in the light of what we know is happening in the skies, and many past unexplained mysteries have taken on a new meaning. One researcher has gone a long way to show that there may be ancient records in stone preserved in our earth which prove the presence and activity of advanced races many thousands of years ago. It may be our Bible contains references to space beings and space ships. If the accounts which some of our visitors have given of themselves are true, then they are utterly opposed to the taking of life, and to any forcible interference with our human freedom of choice. The respect for life and for freedom seem to be two of the great cardinal laws of cosmic space accepted by our space neighbors.

So we return to our main question, Why are they here?. For even if we admit that they have been our neighbors all through the ages, it is clear that this is a time of special visitation. I do not think that anyone can make any certain answer to that question. We stand in the presence of a mystery which we may not yet be morally or spiritually qualified to answer or understand. Yet perhaps a very tentative answer may be given.

1.

ARE THEY HERE FOR WARNING ?

Many people think so and that note has been very strongly sounded in many in many of the messages which have come from outer space. In one of the books which I have found most impressive, there is a description of radio-activity in the upper regions of our atmosphere. This atmosphere which surrounds our earth acts as a filter to the rays which strike upon us from outer space- cosmic rays, the rays of the sun. If that atmosphere were seriously damaged or made unduly thin the results for us and all life would be catastrophic. The signs are that we have reached the point of danger already and if the powers had continued their nuclear explosions on the same scale as previously disaster might have overtaken us. Perhaps the warnings from our space friends have been heard and listened to in high places, for there seems to be a noticeable dropping off in the atomic tests; and though both America and Russia stated that they were both about to resume them they have in fact not done so.

2. ARE THEY HERE TO INSTRUCT AND TEACH US ?.

Yes I think so. We are notoriously slow to learn it is true. Yet I cannot help thinking that over the last few years there has been a slight but noticeable change in the temper and attitude of the great powers upon whom the peace of the world depends. I think it is fairly certain that in the purely scientific sphere much is learning much from our space visitors. But we all recognise that the fundamental change must come in man's mental and spiritual outlook. I believe that Western man is being slowly pushed from the smug materialistic position which he has occupied for the last few centuries and is being slowly compelled towards a new metaphysical and spiritual attitude to reality.

This, it is true, is confined to the few at the moment but its outreach may spread further and quicker than we realise. We may be living in a period when there will be a powerful and radical change in human psychology ..

3. BUT ONLY MAY BE.

We do not know which road man may take, and we know that he now holds in his hands the power to destroy himself. Are our visitors here for rescue if we should turn this planet into a volcano?. Are they here to carry us to a new home in space, if our present one should become uninhabitable?. I think this also is a possibility . But it maybe that over and above these possibilities there is something so vast, so wonderful, so incredible that God has prepared for us, that we can only describe it in the great Biblical phrase, THE DAY OF THE LORD. THE DAY OF FULFILMENT? THE DAY OF THE FINAL CONSUMATION? THE DAY OF THE LORD'S APPEARING. ARE WE STANDING ON THE EDGE OF A NEW DISPENSATION? THE BIRTH OF A NEW AGE. ?.

" O the depths and riches and wisdom and knowledge of God! How unsearchable are His judgements, and how inscrutable His ways. (ROM. 11.33)

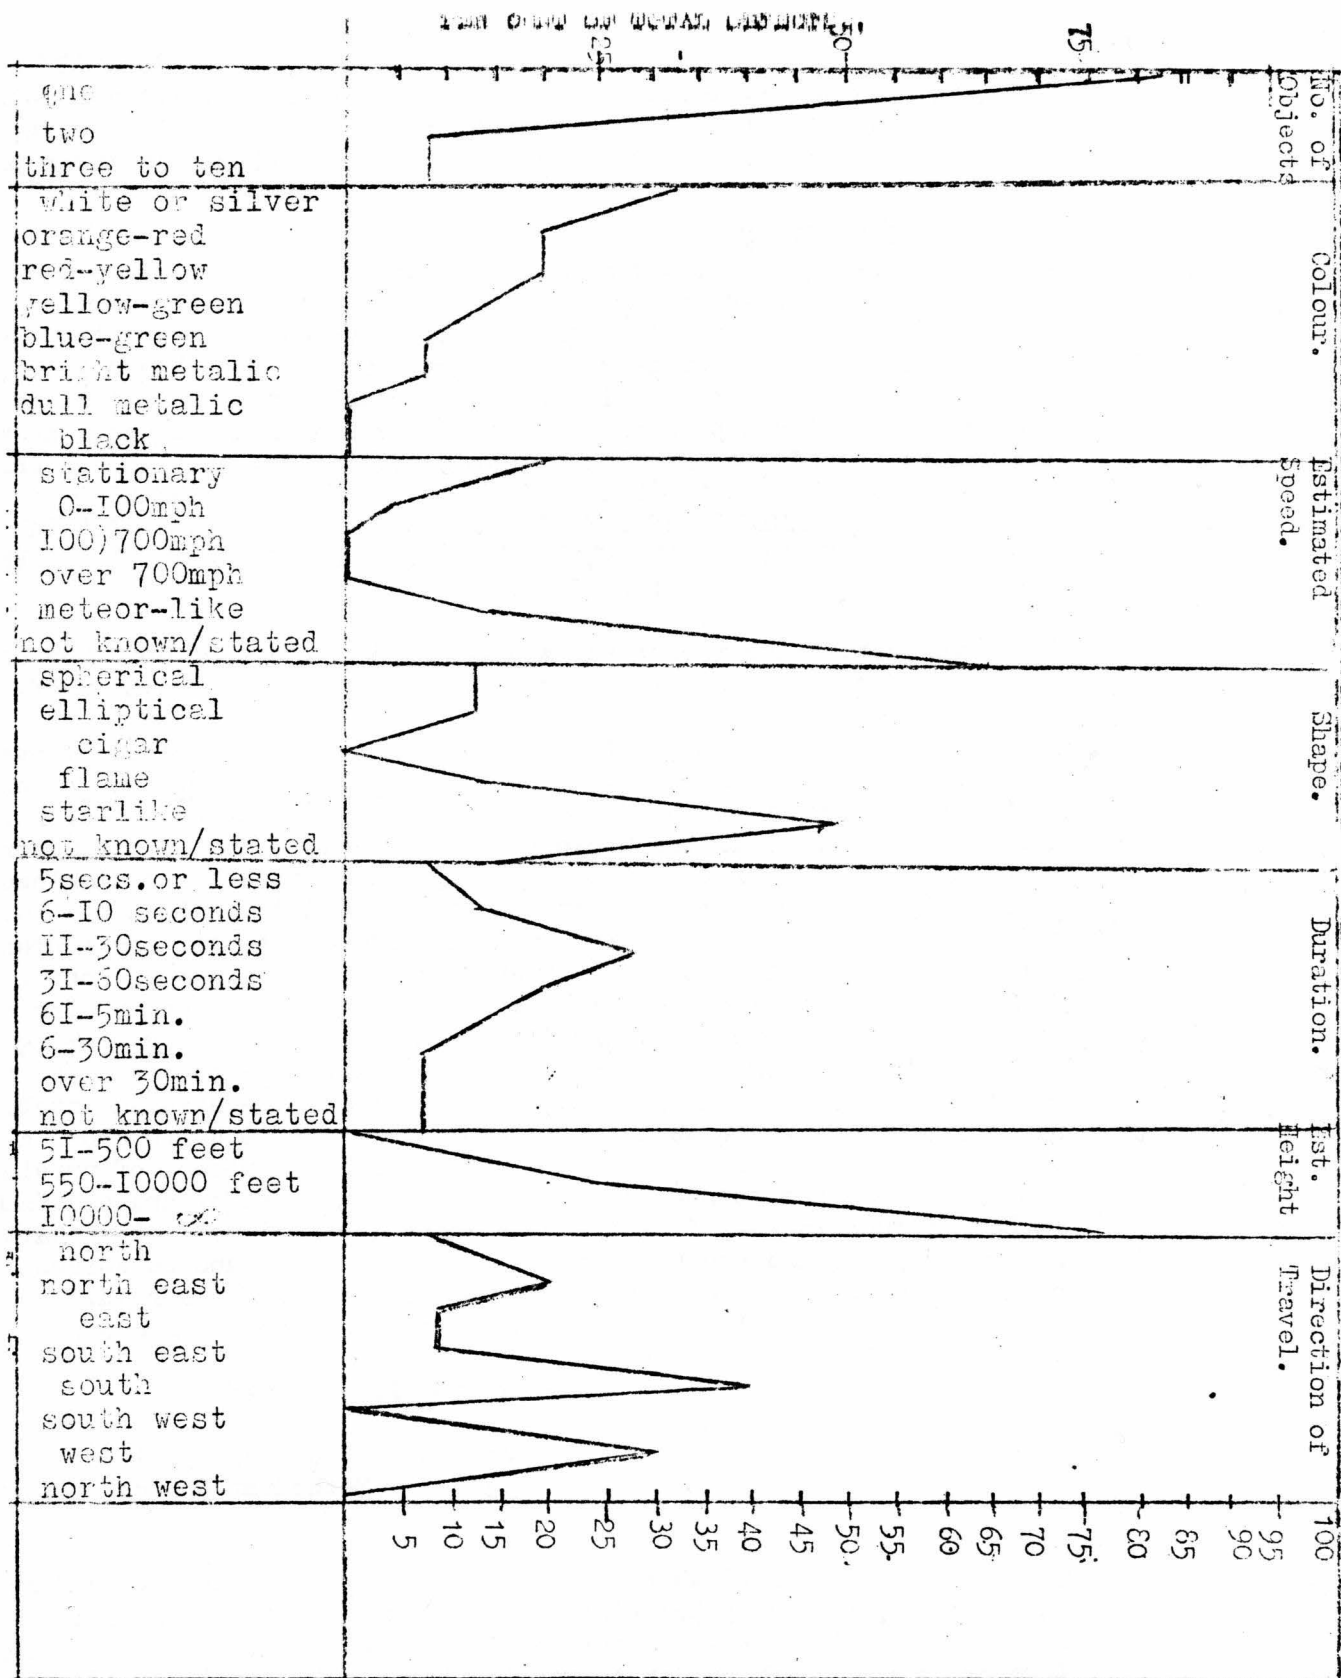

What can be our reaction in the presence of these stupendous events?. I can only speak for myself . First a profound sense of awe. an echo of St. Paul's great words. Man , looking out upon the universe. has always felt himself in the presence of a mystery , but in our modern conceit we have emptied out the mystery. Perhaps the new disclosures of reality which are emerging in our time will lead us to a new humility and a radical recovery of a new genuine religious sense, and thereby a restoration of that essential wisdom without which man is lost . Secondly I believe that we should earnestly study and ponder the new extraordinary facts as they are disclosed to us, genuinely seeking to understand and learn in the spirit of humility. We should avoid the spirit of apathy or indifference, or cynicism or the assured intellectual smartness by which we may imagine ourselves to be quite above all these exotic pursuits. It may be God is in the process of prising open all our minds to new facts we have not known before and old facts we have misconstrued. This may be a painful experience- the shattering of the tidy and accepted world we have built around ourselves. But it is an experience which no Christian should ever be afraid. For our faith is that " from Him and through Him and to Him are all things ".

From the "AGE TO COME "

Journal of the Kollupitiya
Methodist Church CEYLON.

The expressions and views of the Rev. Nelson have so much echoed my own and those I have been expressing for so many years that I feel it is probably one of the most vital messages I have ever printed in this magazine. I strongly urge each reader to give it his most earnest consideration.

THE DITOR .

PER CENT OF TOTAL OBJECTS..

Here are some notes and comments on the programme, broadcast here recently, featuring King and three other gentlemen, two of whom remained anonymous. Dr Duhurst, an astronomer, was one of the three; the others were psychiatrists.

The programme opened with King being in a trance and from his vocal chords came the words, "Orbital Section No 2, Relationship, Mars; Subject, Demand the Truth. Mars Sector Six."

King, who is 40, stated that about 3 years ago while he was washing the dishes, he heard a voice which was definitely out of this world. Later he was visited by a man who walked through a locked door. "The floor boards creaked where the man walked over them, so he was definitely physical," said King.

All this about King is fairly well known I think, so we can leave out much of this background stuff, except that the doctors questioned him as to whether the man's body was the same on Venus, where he had come from, as on Earth. "No," said King, "he has a special body for Earth. I think he is able to change the state of his cellular and atomic structure for Earth conditions."

All this must have sounded pretty crackpot to the doctors, who attempted later in the programme to explain away these things as "delusions". (typical)

King mentioned the dangers the world was facing - the dangers of atomic experimentation and of the large crack which runs from Siberia to down the middle of Australia; also the lacking of Earth people to 'live the laws which are God.' These things King mentioned whilst he was in a second trance.

Well these things have been stated long before King ever knew anything about saucers I think. The only thing was that King emphasised it in another manner; also that the Earth has been visited by spacepeople for 18 million years. This has also been stated by other contactees; others give different periods of time. Do these state-

PAGE FOURTEEN.

ments support each other ?

But King did mention something which is not well known (at least to me), namely that a 16" shell fired at the hull of a flying saucer would burst in the saucer's force screen. I thought the saucers just ducked out of the way of those things. No doubt the airforce can give me some enlightenment as to what happens when they've fired shells at saucers.

Dr Duhurst answered the astronomical side of King's statements but of course not the religious aspect. He said "As scientists we deal with the material world, and we look through our telescopes and instruments and we find that the same elements are present acting in the same way as they do on Earth. We don't know all the answers."

Well sir, you certainly don't know all the answers, and you certainly deal with the material world, that is as presented to the instruments.

Did you know, Sir, that the earth has no oxygen, as revealed by the Sputniks through spectroscopic analysis? Or that the elements which you state are the same anywhere can act differently right on your back door step and you cannot detect them as being present with any instruments that 90% of the scientists today have at their disposal?

If you really are one of those scientists who like to stick to their buggy, just drive up to the fence, get out of your buggy, leave it behind, and sit on the fence. From there you'll have a perfect view of the motor cars on the other side.

But enough of this sarcasm!

One of the anonymous psychiatrists was referred to as Tony. He said that if the flying saucers had no real physical existence they must originate from the mind itself. Consider the inkblot. There's nothing in an inkblot, so what comes out of it must come out of the individual who sees the blot. And the sky is also a suitable place to see things. There is a 'widespread tendency' for people to see things in the sky.

I'll say there is! Because there ARE things in the

(Continued on page twenty .)

THE FOLLOWING STORY AND ITS REMARKABLE CLAIMS HAS BEEN SENT TO THE EDITOR. WITH A REQUEST THAT THE NAME OF THE WRITER SHOULD BE HELD IN CONFIDENCE. AND WITH THE POLICY OF THE MAGAZINE WE RESPECT SUCH. AND PUBLISH THE STORY FOR OUR READERS OWN ASSESSMENT . FOR OURSELVES WE HAVE AS ALWAYS THE OPEN MIND.

"I would like to write for your magazine the following account telling of my experiences with the saucer people , trips aboard the space ships and in particular my visit to a saucer base in Anartica. located within within a 140,000 square mile oasis beyond the South Pole in Queen Maude Land. Yes, I saw fabulous cities of an unknown , advanced civilization responsible for the flying saucers— a civilization whose ancestors belonged to the race that inhabited the lost continents of Atlantis and Lemuria. Conventional aircraft cannot reach the oasis due to the storms of hurricane force that act as a shield around it. The oasis itself is below sea level , has a mild climate, and forest covered. Also there is a huge lake within the oasis of rather warm water heated by underground v volcanic heat supply. Warm air rises from the lake giving the region a mild climate. The oasis issurrounded by a high wall of ice leading up to a plateau causing storms of hurricane force. This is Antartica's Hell Hole.

The Saucers are able to leave and enter the area because theynullify the effect of the atmosphere and hence storms do not effect them . This is why so much of Queen Maude Land lies unexplored by the rest of the world. (ED. NOTE. Local paper this week have reported that Russia is building a base here at this very place 23/2/61.) in that our planes cannot penetratethe storm area in order to reach the oasis. Thereis. however, another way to reach the oasis otherthan by air and this is by submarine through an underground water passage that connects the lake within the oasis with the cold Southern Ocean .

Yes. your government can confirm what I say by a submarine expedition. Tell your people tp proceed to Weddell Sea. and under the ice staying near the bottom . The entrance to the passage lies at the Filchner Ice shelf. where it connects near Vahsel Bay. he submarine can proceed along this undergroundwater channel or passage and come up to surface when it reaches the lake. Water near the bottom of the lakeis very hot and the water from the lake flowing into the passage to Weddell Sea isquite warm.

The saucer people have a ship that can travel as an air ship, even to outer space, as well as to act as a submarine and travel under water. On my trip we flew to the oasis and then left by the underground water passage.

Within the oasis is an entrance to the Cavern World . Yes, it is possible to sail into the interior of the earth. Richard S Shaver spoke of this region many times and his DEROS are very real, for this is the entrance to HELL. I went a short distance into the Cavern World, whoch is not dark at all , but well illuminated. The rocks and walls within the underground c channels give off light in many different colors. I am told that the net work of channels leads into a great hollpw area. Within this area is a Sun

This Sun gives off heat and light and illuminated the whole of the great hollow area. It is located at the exact centre of the earth . . . Most of land masses are floating on hot magma, which comes to the surface and we call lava. There are certain areas on earth in which a break occurs in this hot layer of molten rock . Within these areas, are entrances to the inner earth . One such area is within Antartica.

Before you get ready to laugh at what I am telling you of a hollow earth , inhabited within, and the entrance in the polar regions. let me tell you this : Dr. Edmund Halley. the discoverer of the comet that bears his name, believed in a hollow earth as well as the Swiss Mathematician Leonhardt Euler, John Cleves Symes , born 1780, started a movement that led to Rep. J. Johnson of Ohio introducing a bill in the U.S. Congress for a government financed polar expedition for the purpose of establishing trade and commerce with the people living in the interior of the earth . The bill failed but then a backer of Symes, J.N. Reynolds was able to convince two of President John Quincy Adams' cabinet, Secretary of the Treasury and Secretary of the Navy, to sponsor a seaborne expedition to the Antartica for the purpose of sailing into the earth's centre. Work was started on the project when President Adams was defeated in 1828. Andrew Jackson killed the plan . Later in 1830 Reynolds raised funds for an expedition under Capt. Nathaniel B. Palmer . Needless to say, they did not locate the entrance to the earth in the Antartic region . (Ref. THE SILENT CONTINENT By Kearns and Britton Harper and Brothers 1955) Then we have the experiences of Richard S . Shaver as described in his book I REMEMBER LEMURIA? and Marshall B. Gardner, who in 1929 wrote a JOURNEY TO THE EARTH'S INTERIOR.

If the idea of a hollow earth is so ridiculous, and with inhabitants, how then would a former President of the United States and two of his cabinet become so convinced as to back a government-financed expedition to Antartica? (Ed. note. It must be also remembered that Jules Verne wrote of this. and today this is the only forecast of his that has not been fulfilled , AS YET.) Today , the U.S. Government is sponsoring expeditions to Antartica as well as many other nations, WHY? Is this being done just for scientific reasons or is there definite military implications. ?. When Rear Admiral Byrd went to Antartica in 1946-47, censorship of information was the tightest it had been since World War II. This is confirmed by the New York Times accounts in April 1947 to Washington, D.C. Why the censorship if the expedition was for scientific purposes and not military? Would it not be military if the government recognised the threat of invasion of saucers from Antartica?.

And why did the airforce of the U.S. silence a saucer researcher and close down his UFO group in 1953- a saucer researcher known to all of us as Albert K. Bender-- for discovering the source of the saucers to be Antartica? Yes , if you check one of the last letters written by Bender before he was silenced , he mentions the Antartica as a saucer base (Gray Barker's book THEY KNEW TOO MUCH ABOUT FLYING SAUCERS , page 212.) and if you will check issue sixteen of SAUCER NEWS? Bender told editor Moseley, that he feared an attack of saucers from the polar regions and owned by an unknown race.

This is only half the story. Th first known nation on earth to develope flying saucers was Nazi Germany . This was Hitler's wonder weapon that came too late to turn the tide of the war. The forst flew Feb. 14th, 1945 at Prague, and in three minutes reached over 40.000 ft, and over 1,200 m.p.h. This saucer was 138 ft. in dia. and was built by three Germans (Schriever, Habermohl, and Mieth) and an Italian (Bellonzo) and was built at Breslau. (See German secret weapon of World War II by Rudolf Luser, former wartime head of the Technical Arms Dept. German War Ministry, and published by Neville Spearman Ltd. of London .) In the June 1957 iss ue of the British magazine URANUS, it reports that a German engineer, Vikton Schauburger, of the Biological Institute of Bad Ischl, well known for his Golden Plogh, and his water purification system , built and flew in 1940 a small model of a hat and bell-shaped saucer, using electro- magnetism . At the secret German labor- atories at Lake Schramberg, the Germans developed a translucent metal harder than diamonds. When it became obvious that Germany could not win the war (1943), plans were made to build underground factories in Patagonia, Argentina. Much money was poured into this Nazi base and many technicians from Germany went there , along with the plans to build the saucers, and stage a later come back should Germany lose the war. Hence, Patagonia became a saucer base for the Germans, and Hitler escaped Germany before it fell and went to this new base by submarine. he escaped Germany by plane and made contact with the sub.. off the coast of Norway. The Dec. 1960 issue of the National Police Gazette (New York. N.Y.) ran an article containing proof that Hitler is alive today. Yes, he is alive and I MET HIM .

In 1939 Hitler sent Alfred Ritscher to Antarctica to map out New Schwabenland, which lies beyond the South Pole in Queen Maud Land. The Germans did not have the mass facilities for production at Patagonia to produce saucers in large numbers, but produced experimental models . The first saucers that f flew in 1945 used jets. Schauburger's ideas of using electro- magbetism work- ed fine for small models in 1940 , but it wasn't until 1952 that the Germans had a full scale model using the electro- magnetic type of propulsion. The ship took off from the Argentina base to explore New Schwbenland. Since the atmospheric conditions of the oasis do not affect such a craft, the Germans in exploring the regions in and around New Schwabenland were able to penetrate the storm barrier and reach the 140,000 square mile oasis, and make contact with the advanced civilization living there. They landed at one of the cities, and since then the Germans have been allowed to have a base within the oasis and work closely with the people living within it.

Many of the so-called contactees like Adamski, Allingham , Schmidt, have not contacted those from outer space at all , but those living in this oasis beyond the South Pole . These people have travelled to the Moon and other planets, and these planets are NOT CAPABLE OF SUPPORTING HUMAN LIFE. On some there is plant and animal life, but NOT humans. These space people from the South Pole have told people they were from other planets in order to conceal their true origin. They no longer care if the truth is told since Ray Palmer has already given much publicity to the idea in his publications. Until he released the news, the information was being held back . Bender almost released it in 1953 but the government stopped him in time.

AN AMAZING STORY 4

Bender made a mistake in sending his paper to a publisher, who co-operated with the government. The government did not know of Palmer's plans to release the information, but as he pointed out since he has had trouble distributing his magazine. His first article was in Dec. 1959 issue and in his Feb. 1960 issue Palmer complains of the loss of 5,000 copies, and that his printing plates were destroyed, and later he had to cancel issues of his magazine and mortgage his home because of the financial loss. Palmer's address is. Route 2, Box 36. Amherst. Wisconsin. U.S.A.

Rienholdt Schmidt was singled out for severe persecution by the government as you recall, because an all out attempt was made to discredit him. The one fact that scared the government was his statement that the visitors spoke German yet claimed they were from Saturn. Obviously, if Saturn was inhabited, the people wouldn't speak a language native to earth.

(Editor. We do not agree here but will pass on) No, here was a clue to the secret German saucer base, and this was the thing which made Schmidt's story different from others in that here was our clue of space visitors deceiving people about coming from other planets when actually their origin is EARTH. My own first contact took place near Renton, Washington ON THE NIGHT OF July 8th, 1960. At that time I too was deceived and told my visitors by my visitors that they were from Neptune. Because of my many years as a UFO researcher and investigator, I had an intellectual advantage over the rest and was eventually able to smoke out the fact that my visitors were Germans and not from Neptune. Since then I have been taken rides to Venus, to prove to me that there is no life on that planet, but that Adamski was contacted by those of this earth. I was also given a trip to Antarctica and Patagonia saucer bases. WHERE I MET HITLER: WHO IS NOW AN OLD MAN WITH WHITE HAIR ? BUT IS IN EXCELLENT HEALTH. (CAPS. OURS)

The ships using electro-magnetism can travel very fast and can reach Venus in seven hours our travelling time at millions m.p.h. It takes practically no time to travel from the U.S. to Antarctica-- a matter of minutes.

On Venus there is much vegetation and some animal life. mostly marine creatures. Vegetation is giant and land is swampy and steamy. Humidity and temperature quite high. Evaporation of water is rapid turning daytime and land covered with thick fog. Temperatures in some areas reach boiling point. We landed in the cooler polar region, where the temperature was about 112 deg. F. Because of the high humidity and high temperatures the decay of vegetation is very rapid. the life span on Venus is very short. and the rapid decay of vegetation causes an abundance of carbon dioxide. The reason there is no human life on Venus is that a human being could only live a few days on that planet. Most animals are marine. Everything grows very fast and dies fast. Most animals that do go on land are also able to live in the water too. The bottoms of the oceans or near the bottoms of lakes contain cold water while the surface is very warm.

(I feel that much of the above could be worth discussion in that if forms of animal life exist there, then some form of human existence perhaps different from ours would be possible, ? Editor)

What of the future? The major two conquerors of Nazi Germany were the U.S. and Russia. Hitler seeks revenge by bringing these two powers into a war to destroy each other. German scientists are working for both sides supplying both sides with the needed weapons for such a destruction. World War III is scheduled for 1966 and will be caused by a Nazi underground. The Allies are now building up the West German Army and by 1966 the Nazi underground will take control and surprise the Allies. The West German Army will attack East Germany to unify by force. This will bring the Russians in to save East Germany and the U.S. the West. Hence, the third power causes world war III. Neither the U.S. or Russia want war but they will be led into the war by the third power. The idea is that U.S. and Russia will destroy each other, then the THIRD POWER will move in, pick up the pieces, and rule the world. Hitler's plan was revealed many years ago. In the Sept. '1960 LOS ANGELES HERALD & EXPRESS Jack Moffatt says. "Hitler repeatedly stated that conflict between the East and West was inevitable, and that when it ripened, he would have his triumph."

I don't want to give the impression that all saucers originate from earth. Some ARE coming from outer space.... another solar system. This is Alpha Centauri. The earth was originally seeded with life by this race from outer space. They are the Titans. They are now consulting with their brothers in Antarctica and making plans for the final take over of earth in 1967. These people are having again a problem of surplus population on their planet, and they are looking for a planet to send some of their people to, alleviate this. World War III will reduce earth's population and allow room. So you can see why the space people are willing to cooperate with Hitler and the Nazi because world war fits into their plans also. They do not wish to conquer us directly because their weapons are such that if they used them, it would destroy the possibility of the earth supporting life. Furthermore, U.S. and Russia will not use the atomic weapons anymore than Hitler would have used germ warfare to save Germany. Neither side would use the weapon because they don't want it used against them. Hence, such "wonder" weapons will not be used by them but conventional weapons. Thus, World War III will not end civilization as many people think, The Earth will still be capable of supporting life.

We have saucer flaps at five years intervals. 1947, 1952, 1957, 1962, and 1967. These are the Titans coming from another solar system. Note that Alpha Centauri is $4\frac{1}{3}$ light years from earth. This compares favorably with saucer flaps at five year intervals. Note that World War III will start twenty years after World War II, just as that started twenty years after World War I. This means that 1966 and the saucer flap of 1967 follow one another and the war representing the moving in of the THIRD POWER and thence. Al Bender found this out in 1953 NO WONDER HE WAS SCARED. :

Alpha Centauri is a multiple star, and the saucers are coming from the planet Zuna of the star Proxima Centauri. There have been two squadrons in operation - one leaving Zuna as another arrives at Earth. For example when one leaves Zuna in 1952 and due to arrive in 1957, another arrived at earth in 1952. Sightings between flaps are of an earthly origin

AN AMAZING STORY 6.

The next saucer flap is 1962. The Titans are giants of 7 and 8 ft. tall. as those of Atlantis and Lemuria were giants. At this time the polar regions were free of ice and also inhabited by giants. An explosion of the Sun effected the earth and caused a shift in its axis and thereby changing climates and certain land masses to sink and others to rise. Soon after this the atmosphere was effected from the radiation of the Sun. Some left earth for their home planet in this other solar system. At the time of Atlantis these people had space ships. Others chose to remain and went underground until the period of radiation cleared. When they surfaced through entrances in the polar regions. the atmosphere was such that they lived but succeeding generations became of ~~sm~~ smaller size and no longer were giants- the size being the same as we are today. The succeeding generations forced their giant elders into the Inner Earth and they were held prisoners in the centre of the earth. Legends refer to the guarding of the giants of the center of the earth. Also, they refer to the lost cities of Antartica as Shambalah. Agartha, and the Rainbow City.

Because of have already been threatened I must insist that my name be withheld if you publish my story.

++++

The writer has signed and given his name which we hold as confidential. to give further information we feel would betray a trust. however we must admit that this is the most amazing story or theory we have yet come up against. but certain facts do tie in with what we already are acquainted with. from our own investigations. we cannot however state that we accept the story in its entirety especially that of the latter political views and claims as this is completely new to us. there are certain points that seem to tie in more than that we cannot comment upon. we leave it to our readers to at least find some form of discussion about in their own groups. One thing is very certain the ideas expressed are most unusual and cut across the usual orthodox views of many regarding the friendliness of the saucers. etc. as well as completely upsetting the claims of the contactees. as to the reliability of the visitors. However in the free spirit of allowing expression of opinion the above has been given space. as to its value. well ITS UP TO YOU READER AS TO HOW MUCH YOU ACCEPT AND EVALUATE IT AT. TIME WILL TELL. EDITOR.

GEORGE KING ON ABS 2 Cont. from p. 14

sky, But these things are never found in an inkblot.

The fallacious idea that if a person looks long enough at the sky he's bound to see something is ROT. I didn't know that one could photograph their imagination, or see it on a radarscope.

I remember Prof. Sir Kerr Grant saying, some years ago, that flying saucers were caused by spots in the eye, I believed him and tried to see these spots by looking at the sky for some time. but with dismal failure.

Countless times people have seen saucers when doing something which had nothing to do with bringing the mind to an imaginary state- such as drinking water under a tap of all things, Driving a car in city streets and so forth. Well so much for the saucers. So long.
